NEAR MUNICIPALITY, MARGAO – GOA- 403601.
BRANCHES: MARGAO, PANAJI, VASCO,

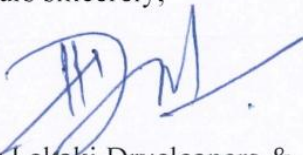

To whomsoever it may concern,

Our establishment, Lakaki Drycleaners & Art Dyers is a reputed and trusted name in the dry-cleaning industry in Goa. Until about a year ago, buying large quantities of diesel for our factory operations was a huge drain on our income, and slowly drove down the laundry's profits.

A.T.E. Solar's thermal concentrator solution was commissioned on our facilities in February 2015. Since its installation, we save, on average, about 15 litres of diesel and 80-90 units of electricity daily. Fuel cost is now under control thanks to usage of A.T.E. Solar's thermal concentrator solution. Also, we do not have to allocate a dedicated operator to operate the solar thermal concentrator due to its highly advanced automated operation. Lakaki can now embark on its long envisaged dream of further expansion and take on increased loads due to the surplus of hot water and steam at our processing factory.

We wish to express our sincere thanks and appreciation to A.T.E. for their commitment to helping us reduce our dependency on expensive utilities, and thereby improve our profitability and the operating conditions at our factory.

Yours sincerely,

For Lakaki Drycleaners & Art Dyers,

Margao, Goa.
