

A.T.E. – an expert resource for textile machinery,
and an impactful innovator in clean technology.

We help our customers create great products,
save water and energy, reduce waste, and
enhance the safety and well-being of their teams.

Our values serve as the foundation of our people
and planet centered approach. We strive for
excellence in all we do.

Textile Engineering Principals

Catalysing Textile Transformations

A.T.E.'s Textile Engineering Group helps you integrate cutting edge machinery solutions for every textile process.

- Spinning
- Warp preparation and weaving
- Circular and warp knitting
- Non-wovens/technical textiles
- Carpets
- Processing
- Air and wastewater management
- Machine upgrades
- Automation and digitalisation

Products from 50+ world leaders including the A.T.E. Group

You can rely on us to help you implement sustainable solutions with the lowest life-cycle costs and the highest efficiency.

Textile Customers

Precision Parts, Perfect Production

TeraSpin is a reliable source for parts and assemblies with very precise dimensional control specially designed for textile spinning and other high-tech machinery.

Components for roving and ring frames:

- High speed spindles
- Cradles
- Weighting arms
- Top rollers
- Upgradation kit for drafting
- Precision engineering components
- Special bearings
- Long cylindrical parts
- Motor shafts

More than 10 million spindles running worldwide!

The Most Reliable Source of Water? Wastewater!

A.T.E. HUBER Envirotech builds solutions to convert wastewater into your most dependable water source - one that is both sustainable and cost-effective.

- Comprehensive wastewater treatment
- Recycling
- Sludge management
- Zero Liquid Discharge (ZLD)
- IoT based solutions for online assistance and optimisation

300+ projects treating
4.8 billion liters per day
of wastewater by
(A.T.E. Huber Envirotech)

55,000+ installed base in 60+
countries (HUBER SE)

Reduce Your Carbon and Water Footprint with IoT

EcoAxis' products unlock the intelligence of things: these integrated IoT solutions improve sustainability and business results. Our products can be deployed in hours and deliver results very quickly

The **axisCONSERVE 4.0** suite uses Industry 4.0 technology to analyse and reduce all contributors to your environmental footprint – energy consumers such as compressors, boilers, chillers, pumps, motors etc; and water and wastewater treatment plants.

axisPLAST 4.0, a product for discrete manufacturing, allows you to **produce more and consume less**.

Our SuperAxis framework lets us build a bespoke solution, should you need one.

Recognised as a TOP 5 IIoT (Industrial Internet of Things) solution company in India

EcoAxis Customers

Can Air Give Us An Rol?

HMX's innovative cooling solutions are key enablers of productive buildings – because clean, fresh and comfortable air is a building block for healthy workspaces and better-quality production and services. They keep dust out and dilute contaminants. HMX's unique products provide high IAQ, while simultaneously saving energy.

- Indirect and Direct Evaporative Cooling Solutions
- Hybrid AHU with Indirect Evaporative Cooling
- DOAS and pre-cooling with Indirect Evaporative Cooling
- Smart AHUs

100 million+ CFM &
20 million+ square feet cooled

Shockingly Helpful Equipment for Industrial SHE

AxisValence works with you to enhance the safety and health of your team and protect the environment with high quality equipment and accessories for a range of industrial applications.

- **Safety:** Static control and monitoring systems; solvent level control in air to prevent explosions
- **Health:** Solvent use reduction and solvent monitoring to improve IAQ; surface cleaning and inspection for hygiene applications
- **Environment:** Reduce waste with our register control, viewing and inspection systems; conserve heat energy with our waste heat recovery system

500+ register control systems sold worldwide!

Impact at Scale

The A.T.E. Chandra Foundation is focused on developing sustainable, scalable solutions to transform lives across India. Our program areas include Water & Agriculture, Capacity Building, Urban Research and projects and Afforestation.

2000+

Over 2,000 leaders trained from 1,500 NGOs via learning and development initiatives

6000+

Waterbodies rejuvenated in 5 states across 52 districts in India

1500+

acres under conservation in Western Ghats

Working to transform urban lives through citizen engagement, urban governance and planning

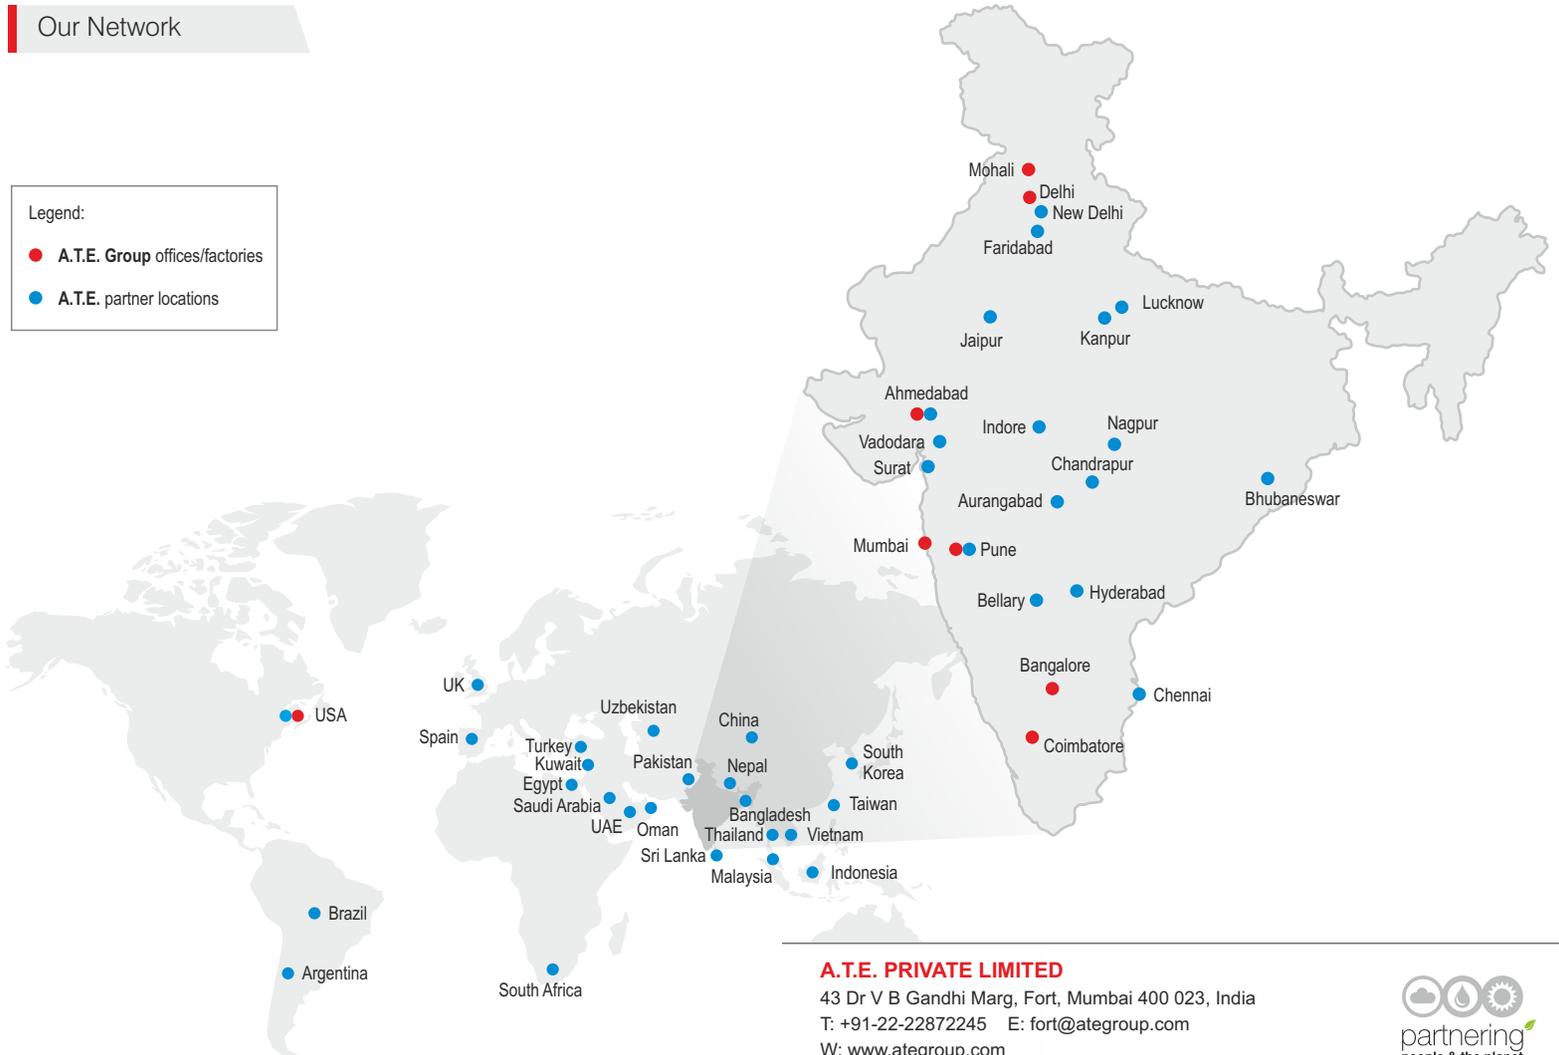

Competition, research, training, and projects to solve key challenges faced by Indian cities
