

Fresh air conditioning for commercial and residential buildings – enhance productivity and wellness

the cost effective and eco-friendly way

HMX solutions provide comfort, and a safe and healthy environment – with very low power consumption. Using Indirect Evaporative Cooling as the foundation, HMX has been providing 100% fresh air cooling solutions for people across the globe for over 20 years.

Drive out harmful bacteria, viruses, and other indoor pollutants

Provide comfortable temperature and humidity

No harmful refrigerants

High energy efficiency for a low operational cost

Up to 6°C lower temperature and 60% lower moisture compared to air-coolers

Low carbon emissions – consume up to 80% less power compared to air-conditioners

Our experience in the commercial and residential sectors includes:

Showrooms and departmental stores

Fresh-cool air despite constant opening and closing of doors

Restaurants and banquet halls

Cool air without recirculation controls odours

Auditoriums/theatres

Excellent ventilation coupled with cool air enhances safety and creates a pleasant atmosphere

Commercial kitchens

Cool, fresh air provides a good working environment for chefs and kitchen staff

Temples/churches/mosques

Fresh-filtered-cool air is a safe and comfortable option for crowded spaces

Offices

Cool, fresh air ensures higher productivity

Living areas in bungalows/villas

Fresh-filtered-cool air creates a pleasant ambience

Classrooms

Cool air, rich in oxygen, enables better learning

Hospital OPDs/quarantine centres

Fresh-filtered-cool air reduces infections and increases comfort

Gymnasiums

Cool air without recirculation provides a healthy atmosphere for the complete workout

Indoor sports arenas

Non-stop supply of fresh-cool air provides an optimal environment for high performance

Installed base of over 65 million CFM cooling more than 13 million square feet area
