

MERCERIZING RANGE

丝光机

GOLLER-PERFECTA

丝光机 (梭织物)

浸碱区

Mercerizing unit

- 浸碱槽可升降
Lye trough is movable in up and down direction
- 均匀的织物横向收缩得益于小部件间距和低张力
Even shrinkage in weft because of short distance and low tension
- 碱浓度和温度的自动控制
Automatic control for lye concentration and temperature

拉幅稳定区

Chain field

- 带超喂的水平布链链条(21m或24m)
The chain field 21m or 24m with overfeed
- 五吸五冲装置
Five power sprays and five vacuums
- 均匀水帘设计保证冲淋均匀
Uniform water curtain design to ensure uniform spray washing
- 独立马达控制链条
Chain controlled by individual motor
- 每节幅宽可独立调节
Change the width by each section of chain field

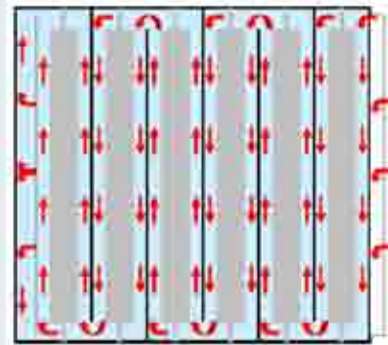

GOLLER-EFFECTA

梭织水洗箱

- 低液体容量利于液体交换
Low liquor content is good for liquor exchange
- 蛇形逆流水洗, 保证新鲜水充分利用
Counter current flow in cascades, guaranteeing fully utilization of fresh water
- 200mm大直径导辊, 导布顺畅, 防起皱
Fabric is smoothly running and crease-free by 200mm diameter roller

主动马达和张力传感器
Driving motor and loadcell

间接加热板, 保证水均匀加热
Indirect steam heated thermpate, guaranteeing water will be evenly heated

GOLLER-CADENA

丝光机 (针织物)

针织织物链条

The chain for knitted fabric

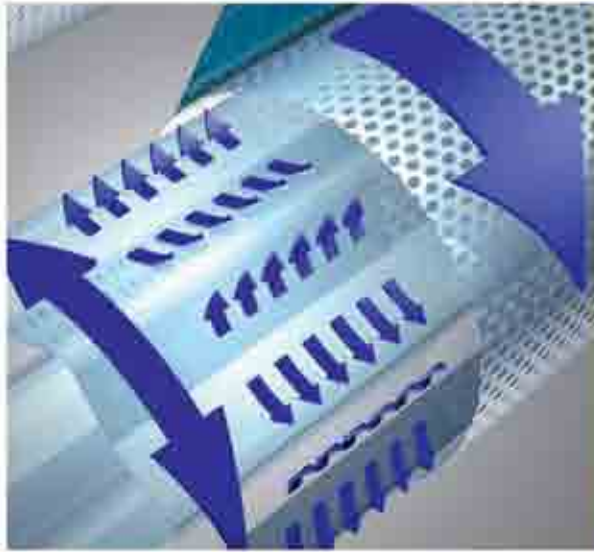

- 水平式针铁链条
Horizontal pin chain
- 带超喂的织物进布
Fabric inlet with overfeed
- 有剥边器和探边
Selvedge uncurlier and edge sensor
- 织物支承托带
Supporting belts for the fabric

SINTENSA

高效水洗箱

High Efficiency Washing Compartment

通过变频器调节转子以控制打水强度
Adjustable rotor speed control water intensity
by frequency inverter

1. 有孔的导布转鼓
Perforated fabric guiding drum
2. 转子表面特殊设计可在织物表面产生正压和负压
Rotor with superior design features for creating liquor turbulence
3. 液体频繁穿透织物
Cross-flow effect on fabric

SINTENSA的水洗效果决定于转子和转鼓相互作用产生的湍流持续穿透织物的强度大小

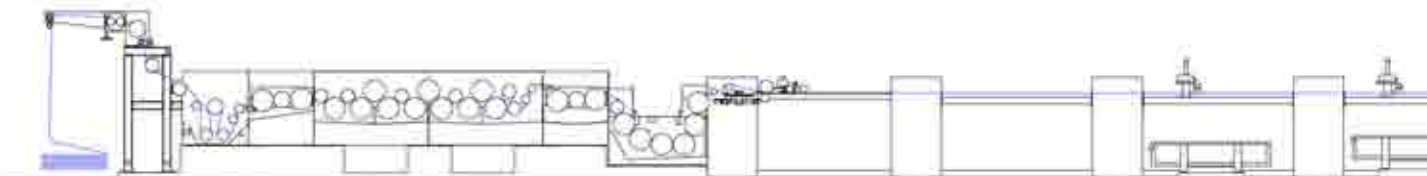

SINTENSA washing effect is the interaction with rotor and drum to create liquor turbulence under liquor and liquor cross-flow through the fabric

- 震荡水洗、液下浸泡水洗与喷淋冲洗三合一的设计
Turbulent washing, dip washing and power spray washing
- SINTENSA水洗箱体的低液量
SINTENSA low liquid capacity
- 耗水量的灵活控制
Flexible water level control
- 低张力得自于转鼓独立变频驱动
Individual frequency control
- 通过精确的张力控制系统确保织物微小伸长量
Guarantee tiny fabric elongation with the precise tension control system

联合机的实例

Possible Set-Ups

CADENA 针织丝光机
GOLLER-CADENA Mercerizing Range for Knitted Fabric

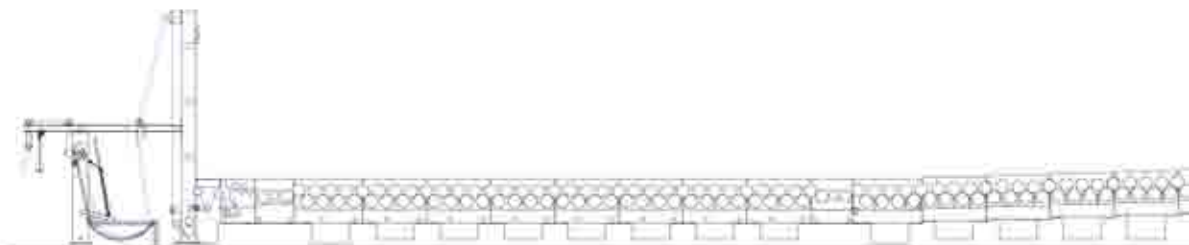

PERFECTA 梭织丝光机
GOLLER-PERFECTA Mercerizing Range for Woven Fabric

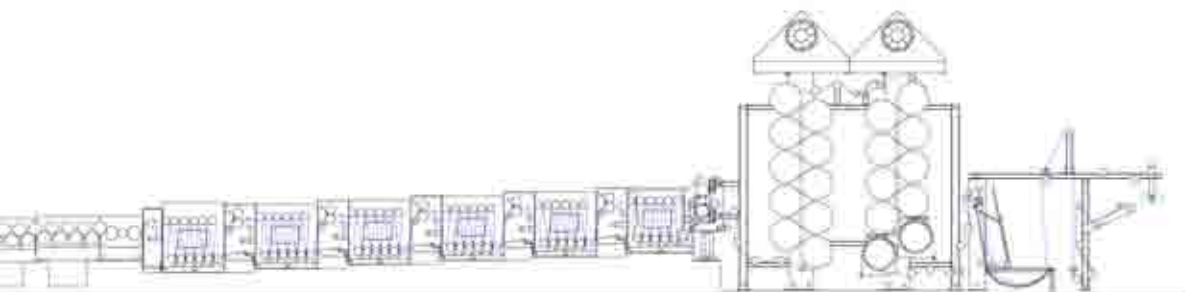

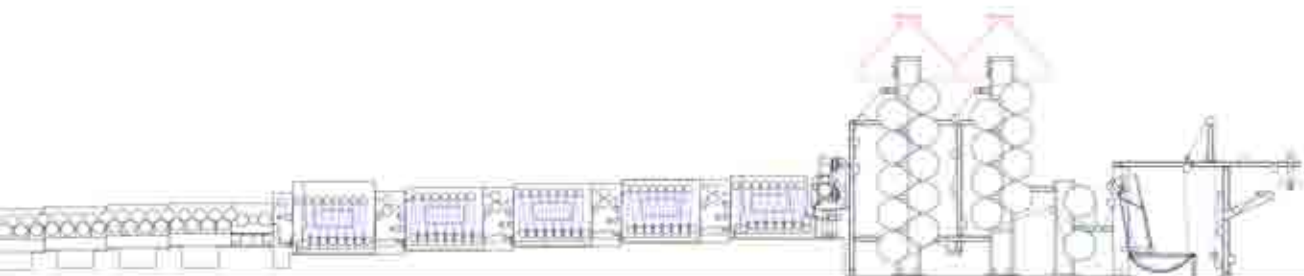

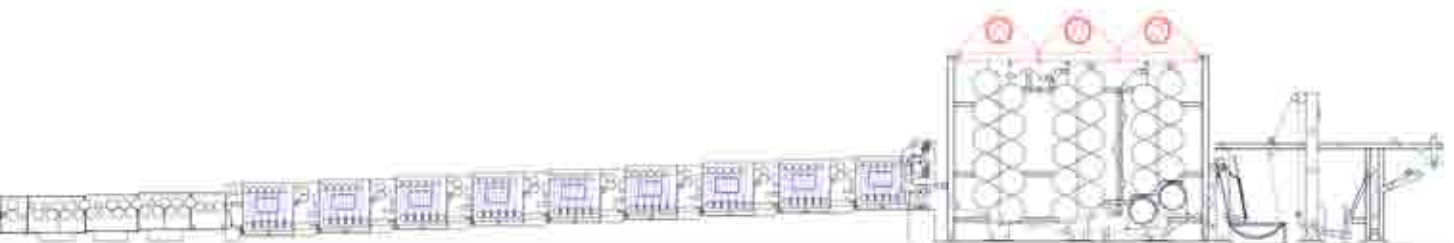

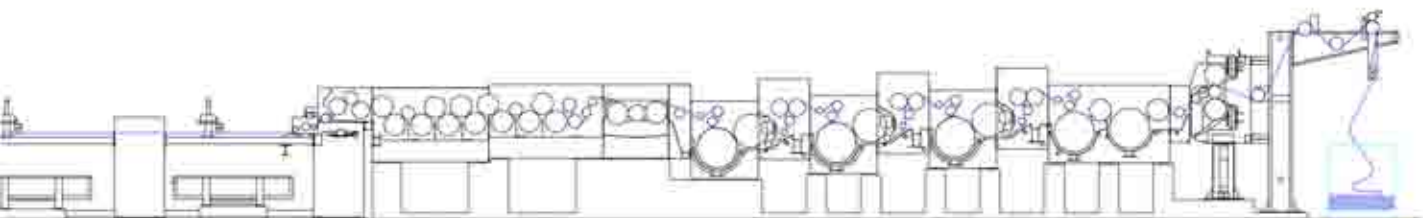

CADENA 梭织丝光机
GOLLER-CADENA Mercerizing Range for Woven Fabric

OPTIMA 梭织丝光机
GOLLER-OPTIMA Mercerizing Range for Woven Fabric

以上四款配置仅供参考，具体配置关联客户工艺要求。
The above four machine configurations are for reference only.
The final configuration is flexible according to the different process requirement.

GOLLER

服务于纺织行业

For the sake of textile

我们一直在创新的最前沿，致力于研发、制造和提供湿处理联合机设备，是现今行业内最重要的生产商之一。

We have always been standing in the forefront of innovation, dedicating to develop, manufacture and deliver wet finishing ranges, and are one of the most important producers in this market segment.

注重全面与细节

Focusing on the whole and detail

我们根据客户要求提供不同的设计方案满足连续高效的加工过程，从退浆到最后清洗，我们提供品种繁多且高效的联合设备。

GOLLER can provide individually designed systems for continuous and efficient production processes. From desizing to end washing we offer a large scope of sophisticated and high-performance ranges.

关注您的发展

Focusing on you

通过我们实际地开发和研究以及不断与纺织行业、化学品供应商和专业院校的沟通，你会获得宝贵的经验与技术。

Due to the ongoing research and development as well as the constant contact with the textile industry, chemical suppliers and institutes you can rely on a wide knowledge.

环境保护是我们的目标

Environmental consciousness is one of our top priorities

通过染料、助剂、水和能源的经济适用，保证经过我们设备的每滴溶液都会充分利用，保持了环境清洁。

We care for a clean environment due to the economic use of dyestuffs, auxiliary agents, water and energy. Each drop of liquor, which is running through our machines will be returned environmentally friendly.

让我们对话

Let's talk together

遍布全球各地的65个代理商能满足您不同的需求，或者也可直接与我们联系。

There are 65 agents all over the world available for your individual requirements. Or contact us directly!

高乐

立信染整机械有限公司

FONG'S NATIONAL ENGINEERING CO., LTD.

香港青衣长达路22-28号8楼

8/F., 22-28 Cheung Tat Road, Tsing Yi, Hong Kong
