

ST-500 Cleaning & Calibration Combination Kit

The ST-500 Cleaning and Calibration Kit is a convenient all in one kit which enables wireless connection to your ST-500 probe for cleaning and calibration purposes. The kit includes one MA-WB wireless adapter, one SER-01 probe cleaning solution kit and one bottle of PTSA-100 calibration solution. The MA-WB device quick connects between the probe and controller enabling wireless connection via Bluetooth to your probe by using the **uPyxis** APP for smartphone. Once connected, the uPyxis APP allows for probe diagnostics which can determine the cleanliness of your probe. Follow the probe cleaning and calibration instruction details in the YouTube link below on how to use this valuable tool to rapidly diagnose, clean and calibrate your ST-500 probe.
