

EcoAxis Case Study: Smart Sustainability

Multi-retail outlet food chain in India

Business challenge

- Real time tracking & improvement of KPIs:
 - Energy to sales ratio
 - Cost of various resources
 - Equipment benchmarking
 - Comfort conditions inside lobby & kitchen
- Evaluating outlet wise energy saving potential

The solution

End to end solution included instrumentation and SuperAxis™ framework for online data analysis & customised report generation using advance data analytics tools. Analytics drives audits with specific insights and these specifically drive improvements.

Benefits

- Reduced energy to sales ratio
- Improved outlet performance
- Online KPI tracking
- Drill down from enterprise to outlet level insights in 2-3 clicks only, providing very powerful user interface
