

When it comes to web video SIZE DOES MATTER!

At high print speeds, it is impossible to accurately examine the print repeat with conventional web viewing systems. Common print defects that are easily overlooked by operators:

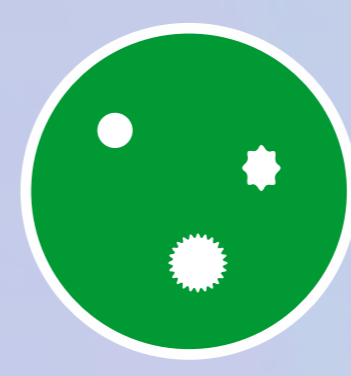

Registration

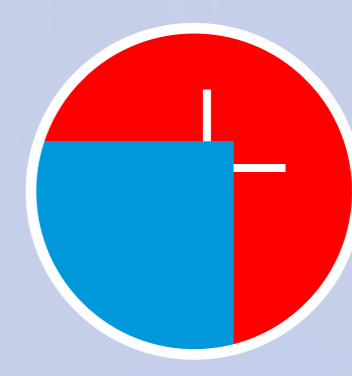

Streaks

Missing print

Drags and holes

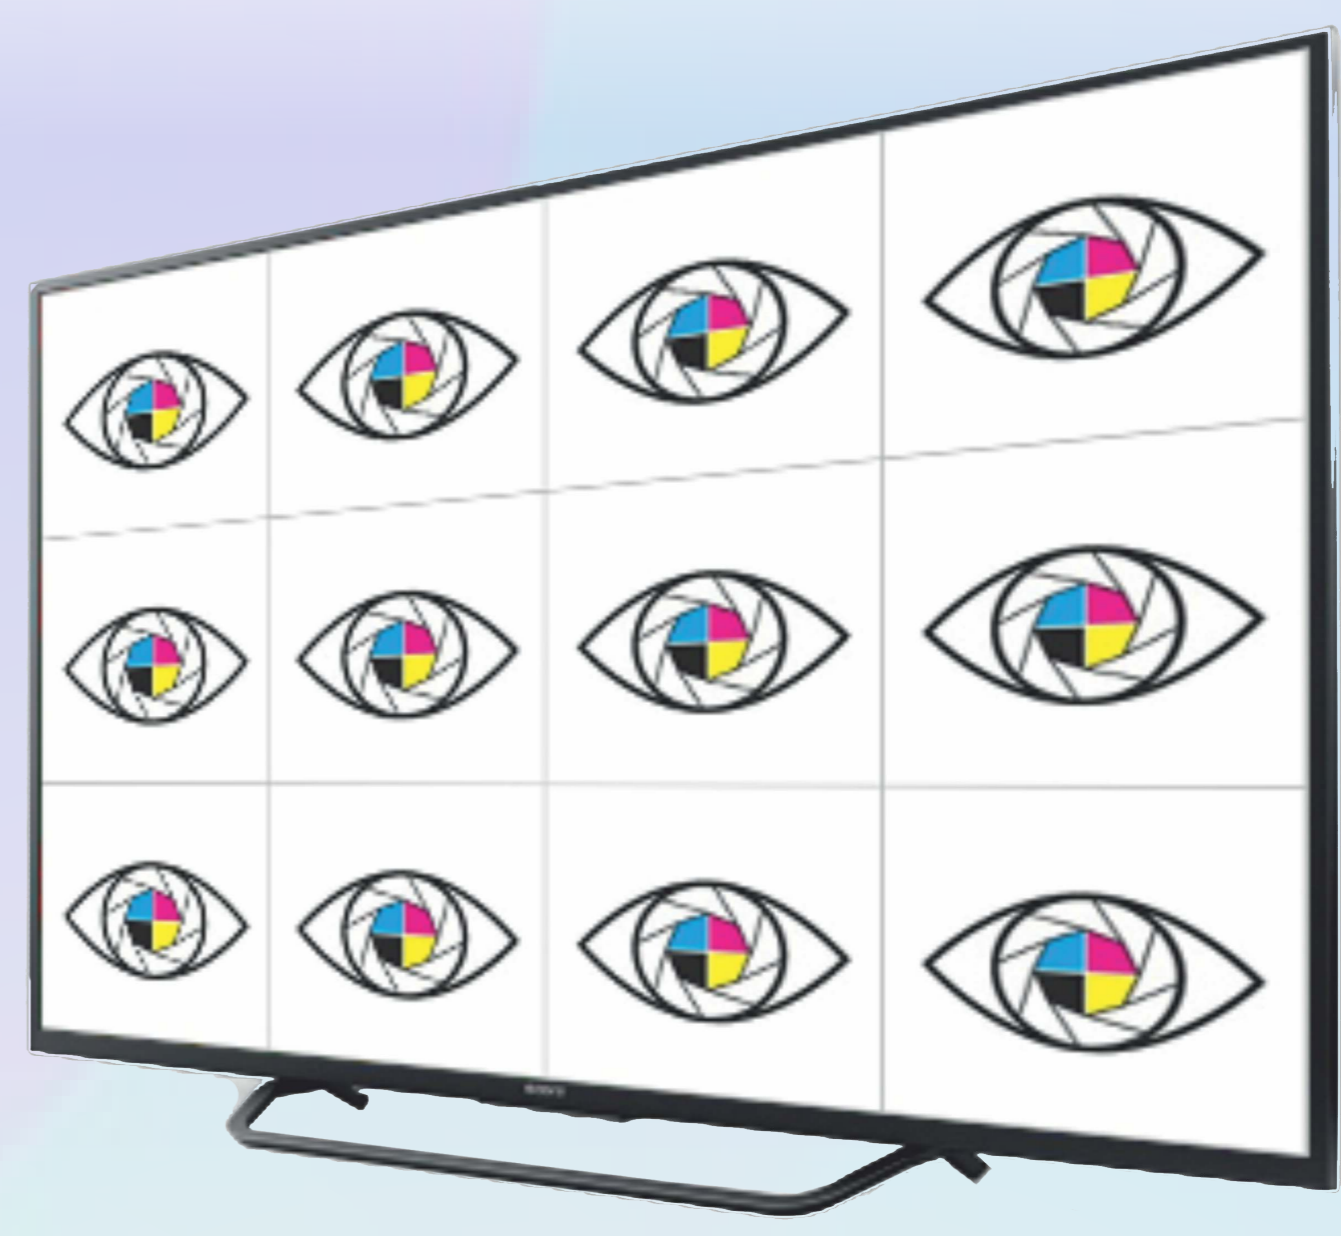

Bleeding

ViewAXIS Tera

The first full print repeat web viewing system for superior web viewing

Print repeat is only partially visible on conventional web viewing system

Full print repeat is visible on ViewAXIS Tera

Features

55" 4K monitor for full print repeat monitoring

Numerous image control options

22" HD monitor for visualising specific portion of the web

Easy and quick access to all portions of the repeat at a time

Split screen function for comparison of both edges

Automatic scanning of critical areas

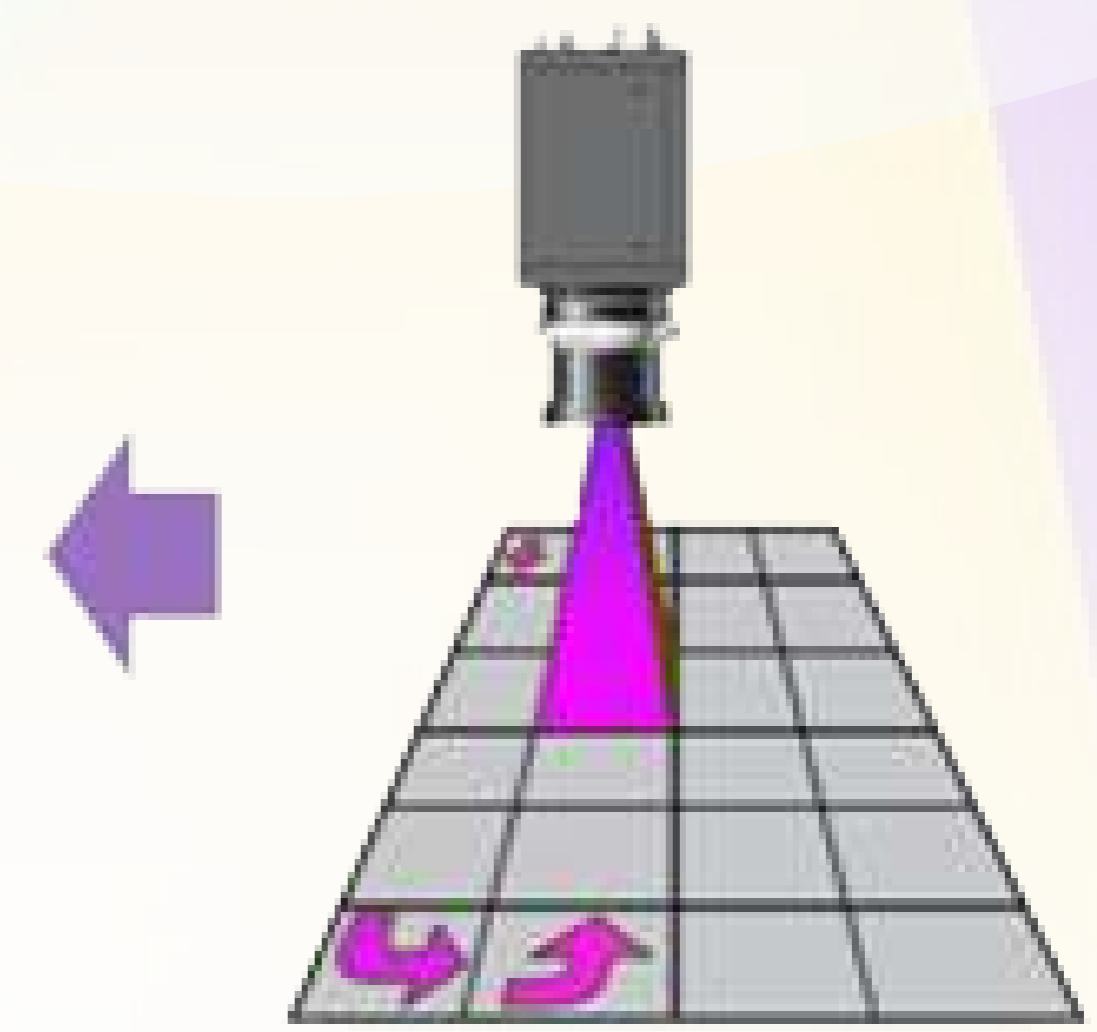

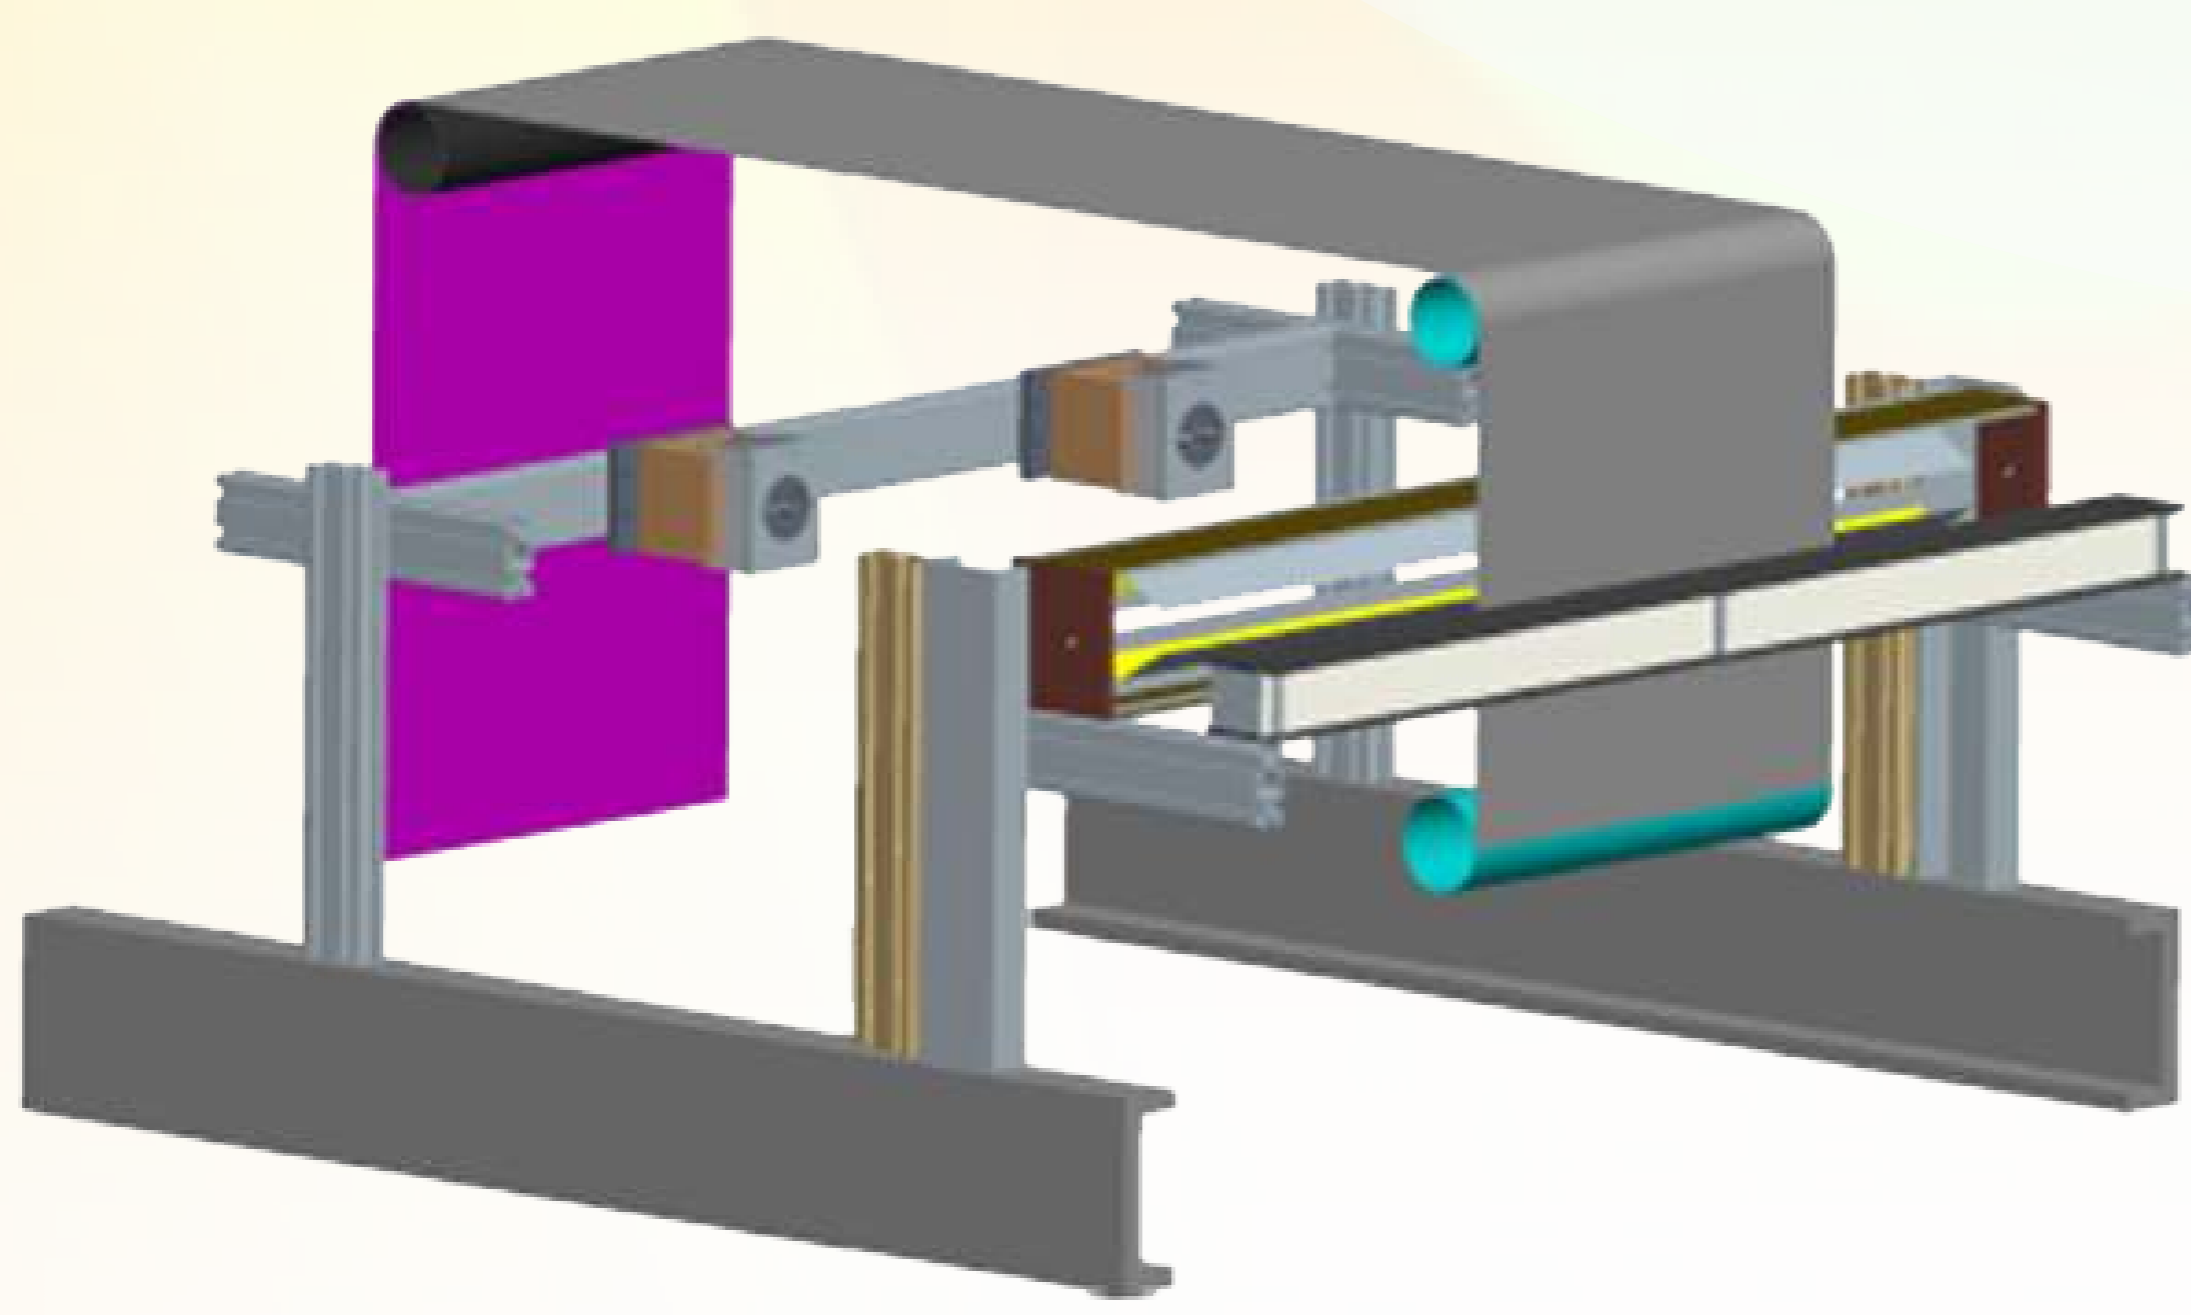

Image resolution equivalent to 50+ megapixels

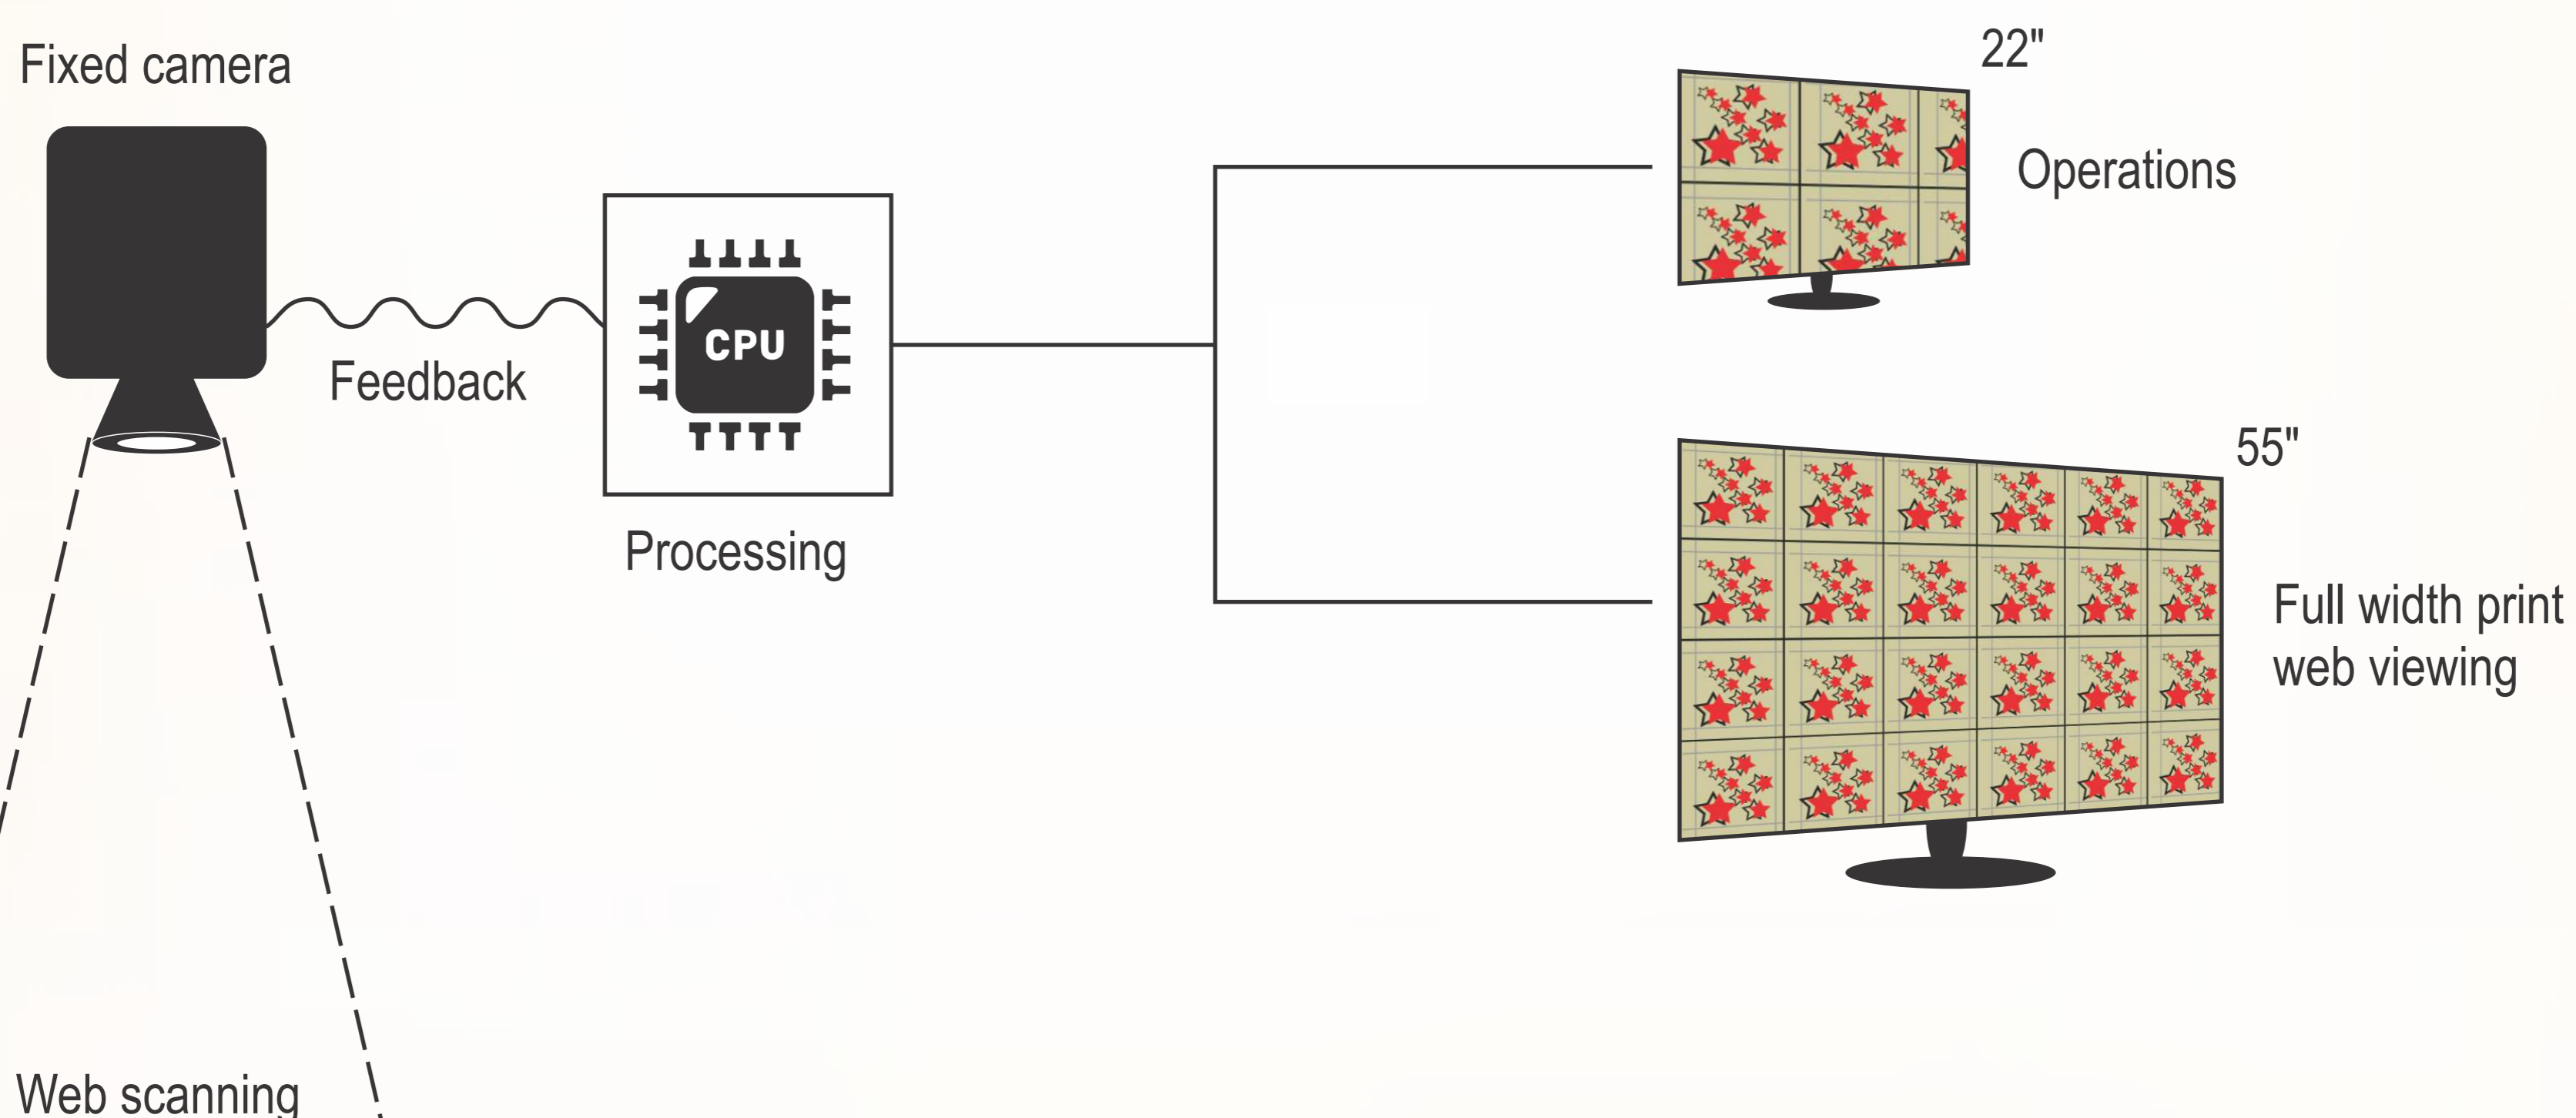

Repeat scan mode and selection of critical areas

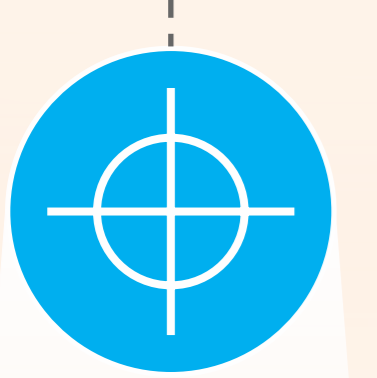

Line scan camera produces high resolution images of fast moving substrates

Process flow diagram

Benefits

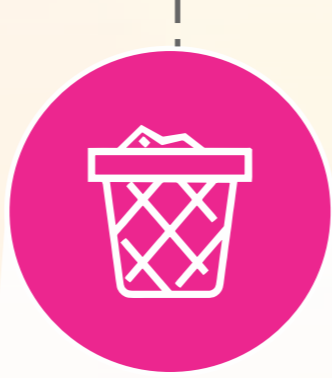

Precise and efficient web monitoring

Captures high resolution near print quality images

Superior output print quality

Reduced material rejection

Improved productivity

Easy to operate with intuitive GUI

Online diagnostics and support

Improved profit
