

# T-MOVE + JUMBO CANS

A revolutionary concept from Truetzschler

- A revolutionary can filling system for TC 10 and 15 cards – from Truetzschler
- In the traditional system cans are moved and coiler is stationery
- In T-MOVE coiler moves and cans are stationery
- In T-MOVE there is no need to slow down card during can change
- Higher throughput as compared to rotary cans
- Lesser floor space requirement
- Best performance when used with **JUMBO CAN** (1200 mm)

## INCREASED PRODUCTION + EFFICEINCY

	Rotary Can	T-MOVE
Average throughput per card/hr	<b>120</b> kg/hr	<b>123.6</b> kg/hr
Average throughput for 10 cards/hr	<b>1200</b> kg/hr	<b>1236</b> kg/hr
Surplus production for 10 cards/hr		<b>36</b> kg/hr
Surplus production per day for 10 cards (36 kg x 22.5 hr)		<b>810</b> kg/day
Surplus production per year for 10 cards (810 kg x 355 days)		<b>288</b> tonnes/yr

## SIZE MATTERS
