

Smart Yarn Catcher

The ultimate solution to eliminate residual yarn accumulation on ring frame spindles

Automatic opening and closing of clamping faces with change in spindle speed

- **Clamping faces open at 12500 rpm (+/- 1000 rpm)**
- **Clamping faces close at 6000 rpm (+/- 500 rpm)**

Benefits:

- Positive gripping of yarn
- No accumulation of residual yarn
- No cleaning of residual yarn – less labour hours
- Reduced start-up breaks
- Improved ring frame productivity

Precise alignment of upper and lower clamping faces with each other

Benefit:

- Minimum yarn used for clamping

Special cutter for yarn cutting

Benefit:

- Easy yarn cutting during removal of full bobbin (tube)

Long service life

QUALITY • RELIABILITY • INNOVATION
